

New Product Announcement from Integra

Integra has again launched a new and unique product to the electrical enclosure market. This time, Integra is bringing you an enclosure that marries the benefits of an industrial enclosure with the slim profile of an electronics case. Ideal for circuit board applications, this new enclosure size is 10" long, 8" wide, but only 2" deep.

This new size is available in the Integra "Premium Line," which consists of tough but attractive polycarbonate enclosures that carry UL-50 type 4X/12/13 and Marine Listings. In addition, the Junction Box construction is UL-50 type 6P, as is the hinged version when four cover screws are used.

This new product has all the features you expect from Integra, including clear or opaque covers, factory-installed latching, multiple component mounting features, and warp-resistant covers.

For more details or a sample, call your local agent or give us a call here at Integra. You can find your agent by logging on to our website, www.integraenclosures.com, and using our "Rep Finder." You can also download a copy of the PDF file for the 10"x8"x2" and all the rest of the Integra line. Or call us at 1-800-321-1970.
