

WE PROTECT SENSITIVE ELECTRONICS IN THE TOUGHEST ENVIRONMENTS.

Integra polycarbonate enclosures offer non-corrosive protection in virtually any environment, strength and durability, as well as the ability to be easily customized for virtually any application.

Size range: 6" x 6" x 4" to 18" x 16" x 10".

POLYCARBONATE ENCLOSURE SOLUTIONS

If you want to connect with an enclosure solution that's ideal for communications solutions, look to Integra. Integra Enclosures are ideally suited to the demanding needs of remote monitoring or communication applications. We keep sensitive electrical or electronic components clean, dry and secure. Our 100% non-metallic, polycarbonate enclosures meet high NEMA/IP protection ratings for dust and moisture, as well as exceptional impact resistance. Integra is focused on producing polycarbonate enclosures that withstand the elements for any type of communication or remote monitoring application.

Every application and installation is unique. That's why Integra enclosures offer a variety of mounting and customization provisions. Whether DIN rail for electronic components/connectors, or back panels, components easily and securely install. These field-mountable enclosures are completely corrosion resistant. And when it comes to customization, Integra offers custom sizes and viewing windows, plus screen printing or holes/cutouts. We provide the ideal design for each client.

When you select Integra, you are getting unsurpassed quality. We rigorously test our products to meet international standards for performance (like IP and NEMA), chemical resistance, impact ratings, UV properties and more. We then certify them to UL/cUL standards, as well as RoHS and Atex.

Be well connected with the best in enclosure protection, call Integra at 440.269.4966 or visit integraenclosures.com.

ABOUT INTEGRA ENCLOSURES

Integra manufactures and markets thermoplastic enclosures designed for use in construction, water treatment, utility, telecommunication, instrumentation, remote monitoring, energy and other applications requiring enclosures that are non-corrosive, non-conductive, easy to install/modify and competitively priced.

THE ADVANTAGES OF INTEGRA POLYCARBONATE ENCLOSURES

Applications that require the performance of a NEMA 12/4X/6P, UL enclosure call for strengths of Integra:

- Superior impact resistance with engineered thermoplastic enclosures
- Thermoplastics are non-corrosive, non-conductive and lighter in comparison to steel
- Polycarbonate enclosures have better UV resistance than fiberglass.
- Easy installation thermoplastic clear covers available
- 100% non-metallic hinge design
- Integra thermoplastic products offer many mounting options molded right into the box
- UL / c-UL Listed
- NEMA 4X, 6P, 12, 13 & Marine Use
- CE & IP 66/68 Protection
- RoHS
- Atex
